

Evaluating Expressions

Substitute the given values, then solve.

1. If $a = 6$, find $2a + 8$.

Show your substitution.

2. If $a = 5$, find $9a + 1$.

Show your substitution.

3. If $a = 5$, find $5a - 8$.

Show your substitution.

4. If $a = 7$, find $3a + 2$.

Show your substitution.

5. If $a = 9$, find $2a + 8$.

Show your substitution.

6. If $a = 5$, find $9a - 30$.

Show your substitution.
