

Evaluating Expressions

Substitute the given values, then solve.

1. If $a = 2$, find $4a - 4$.

Show your substitution.

2. If $a = 8$, find $8a + 2$.

Show your substitution.

3. If $a = 8$, find $6a + 8$.

Show your substitution.

4. If $a = 6$, find $4a + 6$.

Show your substitution.

5. If $a = 3$, find $6a - 1$.

Show your substitution.

6. If $a = 7$, find $2a - 10$.

Show your substitution.
