

Evaluating Expressions

Substitute the given values, then solve.

1. If $a = 5$ and $b = 3$,
find $5a + b$.

Show your substitution.

2. If $a = 3$ and $b = 1$,
find $5a - b$.

Show your substitution.

3. If $a = 7$ and $b = 30$,
find $5a - b$.

Show your substitution.

4. If $a = 8$ and $b = 5$,
find $2a - b$.

Show your substitution.

5. If $a = 5$ and $b = 5$,
find $2a + b$.

Show your substitution.

6. If $a = 6$ and $b = 8$,
find $5a + b$.

Show your substitution.
