

Compare & Contrast

Grade 3 Reading Comprehension Worksheet

Read each pair. Then answer the question.

Rivers and Ponds

A river is water that flows in one direction toward the sea. Fish swim against the moving current.

A pond is still water that does not flow. Frogs and ducks live in the quiet water near the edges.

1. How are rivers and ponds different?
 - a. Rivers never move.
 - b. Pond water flows fast.
 - c. River water flows, but pond water stays still.

Soccer and Basketball

In soccer, players kick a round ball and try to score in a goal. Only the goalie may touch the ball with hands.

In basketball, players bounce a round ball and try to score in a hoop. Players use their hands, not their feet.

2. How are soccer and basketball different?
 - a. Soccer uses a hoop.
 - b. Basketball is played with feet.
 - c. Soccer is played with feet; basketball is played with hands.

Owls and Eagles

Owls hunt at night with big eyes that see in the dark. They fly silently and turn their heads far around.

Eagles hunt in the daytime with sharp eyes that spot prey far below. They soar high on wide wings.

3. How are owls and eagles different?
 - a. Owls hunt at night; eagles hunt in the daytime.
 - b. Eagles hunt at night.
 - c. Owls soar in the daytime.
