

Adding Fractions

Add fractions with different denominators. Simplify.

1.

$$\frac{1}{4} + \frac{5}{8} = \underline{\quad} \underline{\quad}$$

2.

$$\frac{1}{2} + \frac{1}{4} = \underline{\quad} \underline{\quad}$$

3.

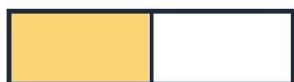

$$\frac{1}{2} + \frac{1}{6} = \underline{\quad} \underline{\quad}$$

4.

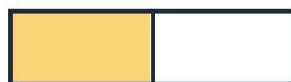

$$\frac{2}{4} + \frac{10}{12} = \underline{\quad} \underline{\quad}$$

5.

$$\frac{1}{2} + \frac{3}{6} = \underline{\quad} \underline{\quad}$$

6.

$$\frac{1}{2} + \frac{2}{4} = \underline{\quad} \underline{\quad}$$
