

Fractions of Sets

Write the fraction of each set that is shaded.

1. What fraction of the stars are shaded?

2. What fraction of the hearts are shaded?

3. What fraction of the hearts are shaded?

Fractions of Sets

Write the fraction of each set that is shaded.

1. What fraction of the hearts are shaded?

2. What fraction of the dots are shaded?

3. What fraction of the stars are shaded?

Fractions of Sets

Write the fraction of each set that is shaded.

1. What fraction of the dots are shaded?

2. What fraction of the stars are shaded?

3. What fraction of the hearts are shaded?

Fractions of Sets

Write the fraction of each set that is shaded.

1. What fraction of the stars are shaded?

2. What fraction of the dots are shaded?

3. What fraction of the dots are shaded?

Fractions of Sets

Write the fraction of each set that is shaded.

1. What fraction of the triangles are shaded?

2. What fraction of the dots are shaded?

3. What fraction of the triangles are shaded?

Fractions of Sets

Write the fraction of each set that is shaded.

1. What fraction of the stars are shaded?

2. What fraction of the stars are shaded?

3. What fraction of the triangles are shaded?

Fractions of Sets

Color the fraction of each set shown.

1. Color $\frac{2}{3}$ of the stars.

2. Color $\frac{2}{3}$ of the stars.

3. Color $\frac{3}{4}$ of the hearts.

Fractions of Sets

Color the fraction of each set shown.

1. Color $\frac{1}{5}$ of the dots.

2. Color $\frac{3}{5}$ of the stars.

3. Color $\frac{1}{3}$ of the stars.

Fractions of Sets

Compare. Write $<$, $>$, or $=$ in each circle.

1.

2.

3.

4.

5.

6.

Fractions of Sets

Compare. Write $<$, $>$, or $=$ in each circle.
