

Main Idea & Details

Grade 3 Reading Comprehension Worksheet

Paragraph 1

Sea turtles spend most of their lives in the ocean. They swim with strong flippers and can hold their breath for a long time. Mother turtles crawl onto sandy beaches at night to lay their eggs. They dig a deep hole, drop in about one hundred eggs, and cover them with sand. Then they swim back to the sea and never see their babies.

1. What is the main idea of this paragraph?
 - a. Turtles have strong flippers.
 - b. Sea turtles live in the ocean and lay eggs on beaches.
 - c. Mother turtles lay eggs at night.

2. About how many eggs does a mother turtle lay?

Paragraph 2

Rain starts high in the sky. Heat from the sun lifts water from lakes and oceans into the air. The water cools and turns into tiny drops that form clouds. When the drops grow heavy, they fall back to the ground as rain. Rain fills rivers and lakes and helps plants grow. Without rain, the earth would be dry and brown.

3. What is the main idea of this paragraph?
 - a. Clouds are made of tiny drops.
 - b. The sun is hot.
 - c. Rain is part of a cycle that brings water back to the earth.

4. What lifts water from lakes and oceans into the air?
